Dahua FishEye Camera Mount Adapter

Model: DAHUA DH-PFA100

1. Introduction

The DAHUA DH-PFA100 mounting adapter is an accessory designed to facilitate the installation of Dahua FishEye cameras on different types of surfaces, providing a safe and reliable installation. This adapter allows versatile mounting, optimizing the stability of the camera and improving the viewing angle.

2. Technical Specifications

Model:DH-PFA100

Material:Aluminum alloy

Color:White

Compatibility:Compatible with specific Dahua FishEye cameras (check camera model in product data sheet)

Dimensions:Φ150.8mmx37mm

Weight:0.21 kg

3. Package Contents

- Dahua DH-PFA100 Adapter
- Mounting screws
- Quick Installation Manual

4. Installation Instructions

4.1. Installation Preparation

- 1. Select location:**Choose a stable surface and make sure it allows good visibility for the camera.
- 2. Gather your tools:**Make sure you have the right tools (drill, screwdriver, level, etc.).

4.2. Installation Procedure

1. Mark the mounting points:

- Place the adapter in the desired location and mark the drilling points according to the holes in the adapter.

2. Drilling and fixing the adapter:

- Drill mounting holes in the surface.
- Insert anchors if necessary (for surfaces such as concrete or brick).
- Place the DH-PFA100 adapter in position and secure it with the screws provided.

3. Mounting the FishEye Camera:

- Align the camera with the adapter and secure it firmly using the fixing screws.
- Adjust the camera position as needed to obtain the desired viewing angle.

4. Stability check:

- Check that the adapter and camera are firmly attached and level.

5. Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the adapter and camera regularly. Do not use harsh chemicals that may damage the finish.
- **Inspection:** From time to time, check that the adapter and mounting screws are tight to prevent slipping or falling.

6. Troubleshooting

Problem	Possible Cause	Solution
The adapter moves or loosens screws.	Bad mounting screws adjusted.	Secure all screws.
The camera does not adjust to the compatible adapter.	Camera model incompatible.	Please confirm compatibility.
Unstable installation.	Surface not suitable for mounting.	Use stronger anchors or change your location.
