4. Technical Specifications

- **Material:Aluminum**
- **Dimensions: φ140mmx39.5mm (φ5.51"x1.56")**
- **Weight:3.00 kg.**

5. Installation

Tools needed

- **Drill**
- **Screwdriver**
- **Measuring tape**
- **Level**

Installation Steps

Step 1: Preparation

- **Verify that all package components are present. Make sure you**
- **have the necessary tools: drill, level, pencil.**

Step 2: Selection of Installation Location

- **Choose a suitable location on the wall or ceiling where you want to mount the**
- **camera. Use a level to ensure a level installation.**

Step 3: Mounting the Adapter

- **Mark the mounting points using the adapter as a guide. Use the**
- **supplied screws and Allen wrench to securely attach the adapter to the selected location.**

Step 4: Position Adjustment

- **Adjust the angle of the adapter as necessary to obtain the desired camera orientation.**
- **Firmly tighten the screws to secure the position.**

Step 5: Camera Mounting

- **Follow the specific camera mounting instructions for the corresponding model (PFB300C, PFB303W or DH-PFA111). Make sure**
- **the camera is properly installed and secured to the adapter.**

Step 6: Verification

- Once the camera is mounted, verify that it is correctly aligned and that the adjustments are correct.
- Make sure all cables are properly connected and protected.

---

7. Maintenance

- Regular Inspection:Perform periodic inspections to ensure that the junction box and cables are in good condition.
- Cleaning:Clean the adapter and bracket with a soft, dry cloth. Avoid the use of aggressive chemicals.
- Check Connections:Check that all connections are tight and free of corrosion.
