

DH-HAC-HDBW3200FN-M

2MP Mobile HDCVI IR Dome Camera
(MODEL ON REQUEST)

- Maximum 30 fps at 1080p
CVI/CVBS/AHD/TVI switchable
- Built-in microphone
- 2.8mm fixed lens
- Max. Infrared length 20m, smart IR
- IP67, IK10, 12V DC
- Shockproof

System Summary

Experience a 1080p Full HD mobile video surveillance solution with the simplicity of analog infrastructure. The mobile camera is designed with a compact shockproof housing, making it convenient to install and adaptable to various applications. It offers a high quality image as well as a multilingual OSD. In addition, the camera employs the strengths of HDCVI to ensure real-time transmission.

Features

4 signals on 1 coaxial cable

HDCVI technology supports simultaneous transmission of 4 signals over 1 coaxial cable, i.e. video, audio*, data and power. Bi-directional data transmission allows the HDCVI camera to interact with the XVR, such as sending a control signal or triggering an alarm. Additionally, HDCVI technology supports PoC for added build flexibility.

*Audio input is available for some HDCVI camera models.

Shockproof

Vibration is inevitable in mobile applications. To avoid image or connection failure, the mobile camera's hardware structure is shockproof with EN50155 certification. Furthermore, the mobile camera adopts M12 aviation connector for stable connection with MCVR.

Simplicity

HDCVI technology inherits the simplicity characteristic of the traditional analog surveillance system, becoming the best option for investment protection. The HDCVI system can seamlessly upgrade the traditional analog system without replacing existing coaxial cabling. The plug and play approach enables Full HD video surveillance without the hassle of setting up a network.

Go clever

The camera is designed with IR LED illumination for better low light performance. Smart IR is a technology that ensures brightness uniformity in black and white images in low lighting. Dahua's unique Smart IR adjusts the intensity of the camera's infrared LEDs to compensate for the distance of an object and prevents the IR LEDs from overexposing images as the object approaches the camera.

OSD in multiple languages

The OSD menu provides multiple image adjustments and function settings to meet the requirements of different monitoring scenes. The OSD menu includes settings such as backlight mode, day/night, white balance, privacy mask, and motion detection. The camera supports 11 languages for OSD menu: Chinese, English, French, German, Spanish, Portuguese, Italian, Japanese, Korean, Russian and Polish.

Protection

The camera's extraordinary reliability is unsurpassed thanks to its rugged design. The camera is protected against water and dust with an IP67 rating, making it suitable for indoor or outdoor environments.

With an operating temperature range of -40°C to +60°C (-40°F to 140°F), the camera is designed for extreme temperature environments. By supporting an input voltage tolerance of ±30%, this camera adapts to even the most unstable power supply conditions. Its 4KV lightning rating protects the camera and its structure from the effects of lightning.
