

Data sheet

Model: D6728

The DAHUA D6728 is an infrared (IR) extension cable designed specifically for video wall projects, compatible with DAHUA's LXXXXUCM-EF controller. This cable allows you to extend the IR signal up to 3000mm, ensuring clear and stable transmission in video wall configurations.

Brand	DAHUA
Kind of product	IR Extension Cable
Model	D6728
Cable length	3000mm
Connectors	Infrared (IR)
Compatibility	DAHUA LSXXXXUCM-EF Controller
Cable material	Copper with PVC coating
Color	Black
Operating Temperature	- 20°C to 70°C
Weight	150g

Main Features:

High Transmission Quality:Ensures a clear and interference-free IR signal.

Durable Design:Resistant materials that ensure long life and optimal performance.

Easy installation:Quick and easy connection with the LXXXXUCM-EF controller and other compatible IR devices.

Wide Compatibility:Ideal for video wall projects and other applications requiring IR signal extension.
